## work experience

Auroria Diamonds

June 2020 - present

### Fullstack Node.js Developer

I work at the e-commerce company, where I completed 3 projects creating both backend and frontend:

✦ Auroria.pl - The e-commerce ecosystem including backend microservices for managing warehouse, orders, offers, 3D configurator, post-sales, blog, authorization + frontend apps - admin dashboard and client website.

✦ Luvli.pl - the e-commerce platform for ordering personalized jewelry. Backend managing offers, orders and integrations with external services such as payments and shipment + frontend apps - admin dashboard and client website.

✦ Ringeo.pl - the comparison tool for engagement rings selling by Polish jewelers

Webwizards

July 2018 - June 2020

### Frontend Developer

I worked 2 years at the agency providing services mainly for the biggest automotive brands in Poland such as Porsche, Volkswagen, Skoda, Audi, Bentley. I made tens of landing pages for automotive campaigns and frontend of the several bigger web apps.

The most noteworthy ones are:

✦ An internal app to managing sales of cars for Audi

✦ An internal app to managing employees of Volkswagen Group Poland

✦ An internal system for Volkswagen Group Poland to conducting interactive trainings for car dealers

✦ Piamarket.sk - the automotive marketplace

✦ Tikitaka.pl - the app to booking ski trips

✦ An app to reporting car damages ( + backend)

## education

September 2017 - July 2021

### Bachelors Degree

### POZNAN UNIVERSITY OF TECHNOLOGY

Computing, Information and Communication Technology

I hereby declare that all the facts and information provided for the resume are true. I allow my personal data stated in the abovementioned applications to be processed for the purpose of recruitment.
