Roman Turaj
Senior Fullstack Developer

experience

HERE Technologies . January 2025 - Present
Senior Fullstack Developer
At a leading location-platform company specializing in mapping, navigation, and location services, I work on one of their core products:
📌 HERE Navigation - a turnkey, cloud-based navigation solution with an SDK variant offering a fully configurable UI/UX and map styling for built-in vehicle platforms in cars like Renault, Dacia, BMW, and Lotus.

Ramp Network July 2023 - December 2024
Senior Fullstack Developer
I worked at a product company in its scale-up stage, developing:
📌 Ramp Widget - a web app facilitating FIAT-to-crypto and crypto-to-FIAT exchanges, serving thousands of users daily and handling millions in monthly transaction volume.

XrWizards November 2022 - June 2023
Senior Fullstack Developer
I served as a one-person team, responsible for the entire web aspect of the main product.
📌 Mazer World - The Metaverse Ecosystem - the core backend API to manage applications and a frontend panel to access UI features. The system supports managing spaces, accounts, organizations, blockchain wallets, and more.

Digital Colliers January 2022 - October 2022
Senior Fullstack Developer
I worked at a software house, delivering solutions for international clients in the gambling industry. I was involved in two projects:
📌 Winfellas.com - a multiplayer experience platform for online casinos
📌 Lotto.com - a back-office tool to manage retail locations in multiple legal jurisdictions

Auroria Diamonds June 2020 - December 2021
Fullstack Developer
At this e-commerce company, I led development for 3 major products, creating complete backend and frontend solutions. The most noteworthy was:
📌 Auroria.pl - an e-commerce ecosystem with two frontend apps (an admin dashboard and a client site) and ten backend microservices for warehouse, orders, offers, a 3D configurator, customer service, and blog management.

Webwizards July 2018 - June 2020
Frontend Developer
I spent two years at this agency, mainly working for major automotive brands in Poland. I developed dozens of landing pages and several web app frontends. Notable projects include:
📌 An internal app to manage Audi car sales
📌 An employee management app for Volkswagen Group Poland
📌 An interactive training system for car dealers within Volkswagen Group Poland

education

Bachelors Degree October 2017 - June 2021
Poznan University of Technology
Computing, Information and Communication Technology
