work experience

Auroria Diamonds   June 2020 - present

Fullstack Developer (Node.js + Vue.js)

I work at the e-commerce company, where I completed 3 following projects, creating both the backend and frontend of each application:

🔧 Auroria.pl - an e-commerce ecosystem including 2 frontend apps - an admin dashboard and a client website, and 10 backend microservices, such as managing a warehouse, orders, offers, a 3D configurator, customer service, and a blog,

🔧 Luvli.pl - an e-commerce platform for ordering personalized jewelry - a backend and 2 frontend apps - an admin dashboard and a client website

🔧 Ringeo.pl - a comparison tool for engagement rings made by Polish jewelers - a backend and a frontend app

Webwizards   July 2018 - June 2020

Frontend Developer (Vue.js)

I worked 2 years at the agency providing services mainly for the biggest automotive brands in Poland such as Porsche, Volkswagen, Skoda, Audi and Bentley. I made tens of landing pages for automotive campaigns and frontend for several of their biggest web apps.
The most noteworthy ones are:

🔧 an internal app to manage sales of Audi cars

🔧 an internal app for managing employees of Volkswagen Group Poland

🔧 an internal system for Volkswagen Group Poland to conduct interactive trainings for car dealers

🔧 Piamarket.sk - an automotive marketplace

🔧 Tikitaka.pl - an app for booking ski trips

🔧 an app to report car damages (+ backend)

education   September 2017 - July 2021

Bachelors Degree

POZNAN UNIVERSITY OF TECHNOLOGY

Computing, Information and Communication Technology
